Query Configurator – Summary

Query Configuration

Need for Excel is greatly reduced
GDPR

Easy report generation via Query Configurator

ABAP programming is only necessary for including more
complex reports

About 50% less programming work

OA4ERP APIs

ABAP API supports the following SQL Operations:

- Join
- Union
- Complex WHERE Condition
- Arithmetic Functions (+-*/)
- Case Expression
- Subselect
- Aggregation
- String Functions (LEFT, RIGHT, ..)

Query Builder – Summary

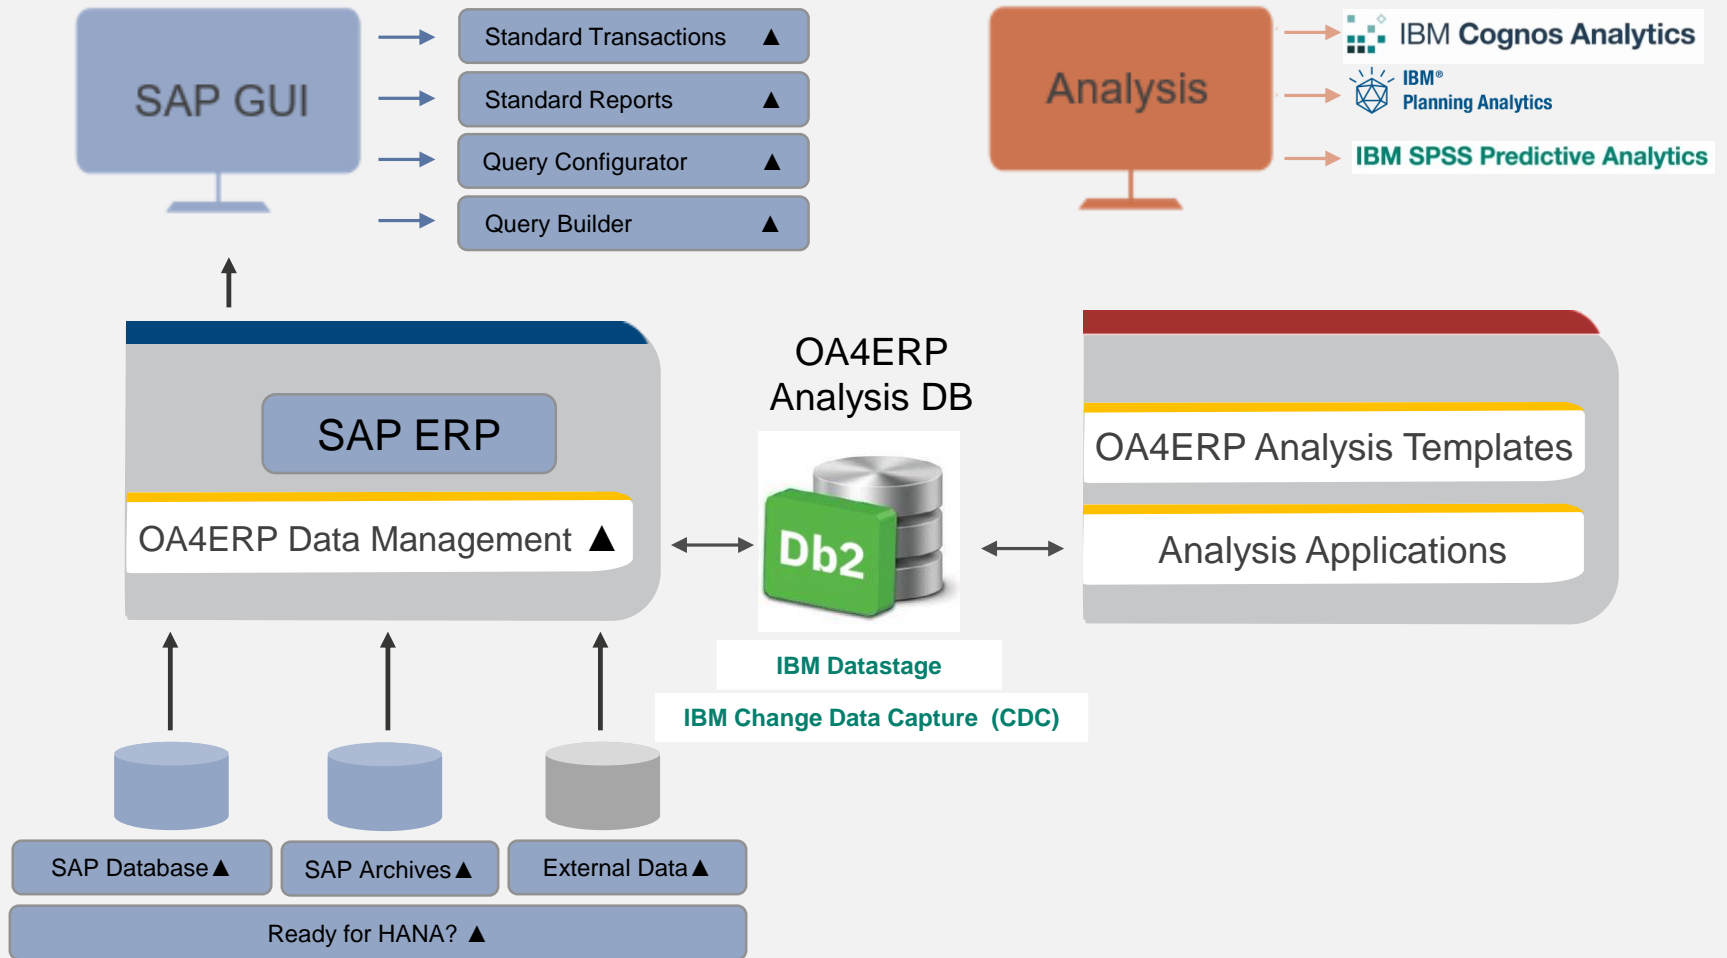

ABAP programming for complex queries with integration of OA4ERP API

very fast access to SAP data and OA4ERP DB

Access to SAP data, external sources and archives

Data Management

- Data analysis (Analyzer)
- More aggressive archiving possible since data can still be displayed in the system
- Integration of external data and archives in operative SAP system
- Monitoring
- Data models optimized for analyses
- Relieving the load on the system → Performance
- Data Governance
- Compliant archive optimization for SAP data, external data and archives

Optimal Preparation for S/4HANA Migration

Before starting migration

Migration preparation

Business Suite S4/HANA

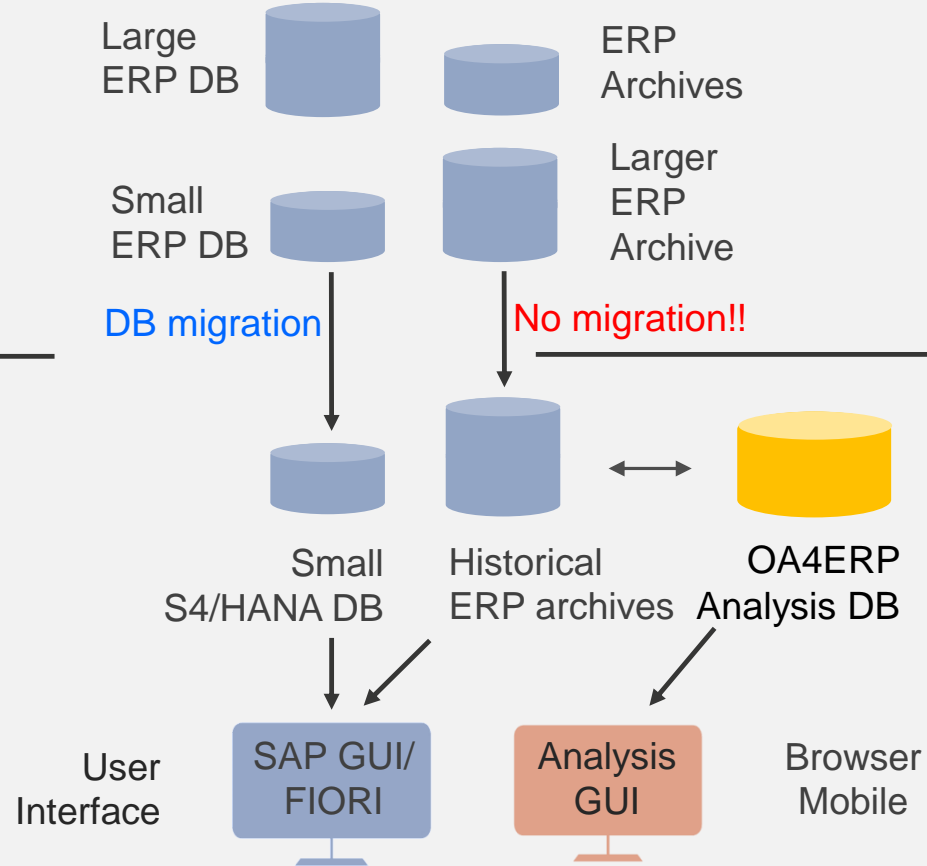

DB migration

No migration!!

Smaller dataset during migration and in HANA

Significant cost savings

Reports from historical data in S/4HANA with OA4ERP
